TRAINING COURSE
FSTD Extended Evaluation for Operators

Introduction

The evaluation of Flight Simulation Training Device(s) (FSTD) is normally performed by the Competent Authority within a 12-month period. Current Aircrew Regulation ORA.FSTD.225(b) allows for FSTD Qualification Certificate Holders (Operators) to apply for an extended evaluation period whereby operators are allowed to extend recurrent FSTD evaluations up to 24 or 36 months. To achieve such extension the operator must prove a robust CMS and implement processes to self-evaluate its own device(s) under EASA's performance-based approach.

With a robust compliance system in place, FSTD operators can contribute to the validity system more independently extending the knowledge base to the market.

FSTD Operators able to apply ORA.FSTD.225(b) on extended validity benefit from cost savings in the (recurrent) evaluation process while also increasing their organisational reputation. Enabled operators can use their self-admin capabilities to strengthen their own FSTD system boasting highly skilled inhouse staff and benchmarking against industry competitors.

🕐 COURSE DURATION

3 days - each day will commence at 09:00 and finish at 17:00, with appropriate refreshment breaks.

👤 TARGET GROUP

This training is ideal for FSTD Operators and ATOs operating FSTDs. Staff include simulator technicians, technical managers/instructors, flight instructors, compliance and safety managers, and auditors.

*Note: For successful self-evaluation and extension approval, **at least one TI** and **one FI** are needed to set up the process in the organisation.*
