

TRAINING COURSE

Aerodrome Inspector Basic Training

Introduction

Aerodromes are complex structures, both from a physical and regulatory point of view. Several entities must interact and cooperate on the aerodrome and within the Competent Authority.

Consequently, the focus is on the regulatory structures and the requirements' principles, concepts, and purposes, without getting lost in the details.

The need for a Total System Approach to aerodrome safety regulations is emphasized and examples are provided.

COURSE DURATION

5 days - each day will commence at 09:00 and finish at 17:00, with appropriate refreshment breaks.

(Ideal as tailored course delivered at customer location)

TARGET GROUP

1. CAA Aerodrome inspectors
2. Senior Aerodrome Managers
3. Accountable Managers
4. Operational services and Maintenance Managers
5. Safety and Compliance Monitoring Managers
