

TRAINING COURSE

Flight Data Monitoring/Flight Data Analysis Programme (Intro)

Introduction

This two day course will provide participants with an insight into how to set up and run a FDM/FDA (a.k.a. FOQA)Program, under the present ICAO/EU framework, and includes a "live demonstration" from one of the leading FDM software vendors. The trainer will also show how FDM can be used to identify precursors to "Overruns and Runway Excursions"; one of the UK CAA's "Significant Seven".

After this course, participants should have a good knowledge of the requirements, process, practical usage and benefits of a FDM/FDA programme, in line with the EU Regulations and ICAO SARPS.

NAA personnel holding an OPS and/or Flight Safety Post and Operations or flight safety staff will benefit the most from this course. It is also beneficial for third party personnel with operations and flight safety experience.

COURSE DURATION

2 days, starting at 0900 on the first day and ending at approx. 17.00 on the last day.

TARGET GROUP

1. National Aviation Authorities:
Staff Members having duties and responsibilities in line with the scope of this course.
2. International organisations:
Operational and flight safety personnel
3. Operators and Service Providers:
Operator's operations and flight safety personnel; and also providers of relevant operational products or relevant services for operators.
