

TRAINING COURSE

EASA Part-66/147

Introduction

The two-day Part-66/147 training course reviews Part-66/147 in detail and elaborates on the role and functions of the EU Member States. It covers Annexes III and IV to Implementing Rule EU 1321/2014 and the corresponding AMC and GM materials in detail. The Technical Requirements (Section A) and the Procedures for Competent Authorities (Section B) of Parts 66 and 147 are dealt with separately in a structured way. This makes the training useful for both new and experienced professionals from industry and authorities.

The attendants receive handouts of all presentations and one Regulation book developed by JAA TO. The book covers the Implementing Rule EU 1321/2014, the requirements of Part-66, Part-147 and the corresponding AMC and GM material. The book is a very convenient collection of relevant regulatory information for day-to-day use and reference:

Part-66 (Annex III) Aircraft Maintenance Licence requirements. Detailing Basic licence, type training, OJT and the role of the National Aviation Authorities. Including the new licence categories introduced with EU 2018/1142. (B2L, L licence etc.)

Part-147, the requirements for a Maintenance Training Organisation. Including the meaning of the regulation change introduced with EU 2018/1142 for approved Basic Training organisations.

COURSE DURATION

2 days, starting at 9:00 on both days and ending at 17:00 on day 1 and at approximately 16:00 on day 2.

TARGET GROUP

Representatives from Industry and National Aviation Authorities.
