

TRAINING COURSE

Fast Track Programme Extended Accident and Incident Investigation

Introduction

The Fast Track Programme Extended Accident and Incident Investigation is a combination of the "Introduction to Accident and Incident Investigation" course and the "Advanced Accident and Incident Investigation" course. This means that thanks to a more efficient continuity, this can be done in 5 days, instead of the 6 days the two separate courses would need.

After this Extended Programme, participants are fully ready to perform small-scale investigations. At the end of this programme, participants will have experience with collecting data, analyzing data, drawing conclusions, making recommendations and writing a report.

Participants will become familiar with:

- The legal requirements for incident investigations and the goals of incident investigations
- How to perform an incident investigation
- Human factors during an incident
- The contents of an incident report
- Why make recommendations and follow up on recommendations in an organisation

COURSE DURATION

5 day course, starts at 9:00 on day 1, and ends at approximately 17:00 on the last day.

TARGET GROUP

The target audience for this course are the persons in organisations who have to perform the investigations of the incidents in their organisation, like: Investigators for ANSPs, Investigators for airlines, Investigators for flight schools, and Investigators for HEMS operators.
