

TRAINING COURSE

Flight Data Monitoring/Flight Data Analysis Programme (Intro)

Introduction

This two-day course will provide participants with an insight into how to set up and run an FDM/FDA (a.k.a. FOQA) Program, under the present ICAO/EU framework, and includes a "live demonstration" from one of the leading FDM software vendors. The trainer will also show how FDM can be used to identify precursors to "Overruns and Runway Excursions"; one of the UK CAA's "Significant Seven".

After this course, participants should have a good knowledge of the requirements, process, practical usage and benefits of an FDM/FDA programme, in line with the EU Regulations and ICAO SARPS.

NAA personnel holding an OPS and/or Flight Safety Post and Operations or flight safety staff will benefit the most from this course. It is also beneficial for third-party personnel with operations and flight safety experience.

COURSE DURATION

2 days, starting at 0900 on the first day and ending at approx. 17.00 on the last day.

TARGET GROUP

1. National Aviation Authorities:
Staff Members performing duties and responsibilities in line with the scope of this course.
2. International organisations:
Operational and flight safety personnel
3. Operators and Service Providers:
Operator's operations and flight safety personnel; and also providers of relevant operational products or relevant services for operators.
