

TRAINING COURSE

Occurrence Reporting in Aviation

Introduction

It is customary in the aviation industry to report many occurrences without proper procedures. This leads to piling up of reports at authorities, and a loss of oversight. For example, several Air Carriers (AOC Holders), CAMOs, Certifying Staff, Part 145 Organisations et al report as much as possible, compromising efficiency and overview of what they have reported.

Moreover, some occurrences that should be reported are not reported optimally. This leads to endangered/unsafe operations, and a lack of knowledge of an occurrence in the departments concerned.

The 2-day Occurrence Reporting training course will provide tools that ensure the effectiveness of reporting, leading to a reduction in workload for different departments/stakeholders and enhancement of safety.

A pre-requisite for attendance in this course is that the participant has familiarisation with aviation regulations related to processes subject to occurrence reporting.

COURSE DURATION

2 days (starting at 09:00 both days and ending at approximately 17:00).

TARGET GROUP

CAA Personnel, Operators, Managers, Postholders Maintenance, Quality Managers, Compliance Managers, Pilots, Certifying Staff, Airworthiness Review Staff, Part M Organisations, MOA, DOA, POA Organisations, and independent professionals.
