

TRAINING COURSE

Auditing in Crew Licensing Environment

Introduction

The aim of the course is to equip trainees with the competencies to effectively perform the role of an aviation auditor within the field of flight crew licensing.

This course aims to offer practical training in compliance monitoring techniques. This training will provide participants with the knowledge, skills and attitudes to conduct efficient audits of various systems, procedures and processes involved in the field of flight crew licensing, as well as their corresponding management structures, thereby supporting business goals.

COURSE DURATION

3 Days: 09:00 - 17:00 hrs.

TARGET GROUP

This course will be of most benefit to Future auditors with a Part Air Crew background and working area of expertise (ATO, DTO etc.).

This course covers auditing techniques for those who are relatively new to auditing. If you're already an experienced auditor but new to the Air Crew area, a regulatory course in Part Air Crew would be more suited. Or, take this course instead of a recurrent auditing techniques course.
