Advanced EASA Part-IS - Implementation

Introduction

This course aims to assist aviation professionals with the implementation of an Information Security Management System (ISMS) within their organizations, in order to ensure that they are prepared for the latest information security requirements.

This course provides participants with the knowledge, skills, and attitude to implement the ISMS. It delivers a holistic understanding of ISMS objectives, regulatory requirements, and implementation strategies, ensuring compliance with the relevant regulatory frameworks. Participants will explore each requirement in detail, and will engage in interactive exercises, discussions, and breakout sessions to apply the learning to their respective entity.

🕐 COURSE DURATION

4 Days: 09:00 - 17:00 hrs.

👤 TARGET GROUP

Personnel engaged in the implementation of the PART IS within organisations (as specified within the regulatory framework) and competent authorities.

This would include the Accountable Manager, the Common Responsible Person, as well as the person or group of persons appointed to implement the requirements of the PART IS, as well as the person or group of persons responsible for compliance monitoring.
