

TRAINING COURSE

ICAO TRAINAIR PLUS - CORSIA Verification

Introduction

The Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA) Verification Course provides training on how to verify CO₂ Emissions Reports that have been prepared by aeroplane operators, in accordance with the provisions of the CORSIA Standards and Recommended Practices (SARPs).

COURSE DURATION

5 days, starting at 09:00 on all days, finishing at 16:30 on the last day.

TARGET GROUP

Primary target population:

- Professionals with experience in the verification of CO₂ emissions using ISO 14064-3:2006, who want to get involved in the verification of aeroplane operators' CO Emissions Reports under CORSIA.

Secondary target population:

- National Accreditation Body (NAB) officials or State Authorities who have a limited accreditation structure in place to support the CORSIA verification process and wish to familiarize themselves with this subject matter;
- Aeroplane operators who wish to establish procedures for an internal pre-verification of their data before submitting its Emission Report to the verification body, which is a recommended voluntary practice by ICAO. (Reference in Annex 16, Volume IV: Part II, Chapter 2, 2.4 and Appendix 6).
