

TRAINING COURSE Cabin Safety Operations

Introduction

Many aircraft accidents are survivable and a significant contributory factor can be the effectiveness of the cabin safety procedures including the activities of the cabin crew.

This course will introduce those factors which a regulator will need to include in an oversight regime and how they might be included in a practical cabin safety oversight programme.

In the end of the course, participants will have a detailed knowledge of the EU Regulations, related to cabin safety requirements and their implementation, besides on how to establish a high quality cabin safety inspection programme.

The following topics will be addressed:

- → EU Regulations Cabin Safety Requirements
- → Number and Composition of Cabin Crew
- → Cabin Crew Training
- → Cabin Safety Inspection Programme
- → Passenger Safety Information
- → Emergency Evacuation

COURSE DURATION

3 days, starting at 9:00 and ending at approximately 17:00 all days.

TARGET GROUP

Regulators - Flight Operations Inspectors and Cabin Safety Inspectors.

As a pre-requisit, it is good to have a basic working knowledge of EU regulations, as they relate to cabin safety.
