

TRAINING COURSE

Aircraft Registration

Introduction

What is required to register an aircraft? What can a national authority demand from an applicant? Where do all the requirements come from? These questions and many more will be answered in this course, which looks at the topic from two sides: authority and applicant.

This training is a good starting point for beginners - it often is referred to as "Aviation 101" - but it also gives experts with lots of experience a better look at specific topics. It describes the whole process of registering an aircraft, the different areas of aviation that are affected such as airworthiness, flight operations, air traffic control (air space limitations).

The training provides a road map to guide you through the difficulties of having an aircraft registered.

COURSE DURATION

1 Day - 09:00 - 17:00 hrs

TARGET GROUP

This training is a good starting point for beginners - it often is referred to as 'Aviation 101' - but it also gives experts with lots of experience a better look at specific topics.

Ultimately, the course is aimed at professionals who are new to aviation and mainly:

- Owners of aircraft
- Operators
