

TRAINING COURSE

Cabin Safety Operations

Introduction

Many aircraft accidents are survivable and a significant contributory factor can be the effectiveness of the cabin safety procedures including the activities of the cabin crew.

This course will introduce those factors which a regulator will need to include in an oversight regime and how they might be included in a practical cabin safety oversight programme.

In the end of the course, participants will have a detailed knowledge of the EU Regulations, related to cabin safety requirements and their implementation, besides on how to establish a high-quality cabin safety inspection programme.

The following topics will be addressed:

- EU Regulations Cabin Safety Requirements
- Number and Composition of Cabin Crew
- Cabin Crew Training
- Cabin Safety Inspection Programme
- Passenger Safety Information
- Emergency Evacuation

COURSE DURATION

3 days. The course times will be 09:00 - 17:00 hrs, or 08:00 - 16:00 hrs. You will be informed of the course times and login details to the virtual environment by email latest 2 days prior to the virtual course's starting date.

TARGET GROUP

Regulators - Flight Operations Inspectors and Cabin Safety Inspectors.

As a pre-requisite, it is good to have a basic working knowledge of EU regulations, as they relate to cabin safety.
