

TRAINING COURSE

Electronic Flight Bag (EFB) - The Paperless Cockpit Training Course

Introduction

The main focus of this course is on the existing regulations and guidance of EFB as laid down AMC 20-25, including its practical application. It will also give an overview of the FAA AC 120-76C. This training will also look at how to make a business case.

The course will include group exercises to gain a better understanding of how to implement and gain approval for an EFB System, which is of relevance to both the operator and the regulator. Moreover, this course will use case studies to illustrate how both a business air operator and a major airline have implemented an EFB system. The course concludes with the operational aspects of an EFB system, including the Human Factors.

The topics to be covered include:

- Introduction, explaining Purpose, Background, Overview and Definitions;
- Law and Documentation, rules and regulations for the approval process, specific areas requiring evaluation;
- Implementing an EFB System with cases of - (a) Business air operator or - (b) Major airline; and
- Introduction to Flight Operations (Flight Crew Operating Procedures, Weight and Balance, and more).

COURSE DURATION

This is a 1-day course, starting at 09:00 and ending at approximately 17:00.

TARGET GROUP

- Pilots (EFB evaluation, overview, training)
- EFB Administrators (initial) Inspectors (EFB requirements)
- Quality/Compliance Manager (overview, introduction, training)
- Training Managers, instructors
