

TRAINING COURSE

EU Ramp Inspection Programme (SAFA) - Inspectors Recurrent

Introduction

The EU Ramp Inspection Programme is a mandatory safety programme within the European Union (EU). All ECAC member states and a number of signatories states not part of ECAC are performing EU Ramp Inspection Programme inspections on foreign state operators. In order to be able to perform EU Ramp Inspection Programme inspections, the inspector must have followed initial EU Ramp Inspection Programme training. Once qualified, ramp inspectors should undergo recurrent training in order to be kept up to date.

According to AMC1 ARO.RAMP.115(b)(3), the competent authority should ensure that all ramp inspectors undergo recurrent training at least once every 3 years after being qualified as EU Ramp Inspection Programme Ramp Inspectors, or when deemed necessary by the competent authority or the Agency, e.g. after major changes in the inspection procedures.

The Agency will inform the competent authority of such necessity and the associated timeframe for implementation. Recurrent training should be delivered by a competent authority or by an approved Ramp Inspection Training Organisation.

The recurrent training should cover at least the following elements:

1. New regulatory and procedural developments:
2. New operational practices
3. Articulation review of other European processes and regulations (list of banned operators or aircraft pursuant to Regulation (EC) No 2111/2005, authorization of third country operators)
4. Using data collected from Ramp Inspections and standardisation and harmonization issues

COURSE DURATION

1 day, starting at 9:00 hrs. on finishing at approximately 17:00 hrs.

TARGET GROUP

Registration is limited to EU Ramp inspectors only.
