

TRAINING COURSE

ICAO-M-ITP: Fundamentals of Instructional Competencies

Introduction

The course provides instructors with the fundamentals of instructional competencies to prepare them for effective deliveries of competency-based training in compliance with ICAO Doc 10097, Training Instructors Guide (TIG), 1st ed., 2021 and international best practices in civil aviation.

Ensuring effective competency-based training can be a challenge nowadays. Many organizations face time and financial constraints, leading to insufficient instructor training and, as a result, lower course quality.

This M-ITP is designed to bridge this gap by equipping participants with the skills, knowledge, and attitudes needed to deliver high-quality, competency-based training. By aligning with ICAO guidelines and using the most efficient instructional strategies, this course ensures that both experienced and new instructors can provide effective training that meets the highest standards.

COURSE DURATION

- Participants will be granted a 3-month access window from the date of registration to complete the course.
- This online course offers approximately 11 hours of interactive digital content. It is recommended to spread participation over at least four days for optimal learning.

TARGET GROUP

Primary target population

Newly engaged and experienced instructors without formal training background.

Secondary target population

- Non-aviation instructors and specialists who wish to upgrade their instructional competencies to deliver CBTA training courses.
- Course developers and curriculum designers who develop competency-based courses.

- Training Managers who conduct planning and oversight of training activities
- Civil Aviation Inspectors in charge of approval and oversight of CBTA.
